

Attn: FBI, Police, Firemen - Many people in the United States, including FBI Agents, are being tracked with microwave “bullets” from cell towers - 24/7. This is a massive, illegal operation run by the CIA & USAF.

TargetedJustice.com

To prove this – hold your arm outstretched, level with your head, with your palm facing you. Turn around slowly thru a complete circle, and feel the microwave pulses or “pops” on your finger joints. Sometimes it will feel like a “pressure” or tingling on the back of your fingers. There are usually 4 or more cell phone towers that are hitting you with microwave pulses. The microwaves are also used to **direct subliminal messages at your brain**, 24 hours every day, and can cause permanent brain damage.

Every cell tower within 2 miles is hitting your head, about once every second, with a microwave pulse that keeps track of your GPS coordinates. These GPS coordinates are coordinated with a supercomputer at **Schriever Air Force Base** near Colorado Springs. The **CIA's Domestic Headquarters, near Denver**, are providing the funding for this illegal operation, which is a violation of the U.S. Constitution.

The cell tower frequencies used to track you are **2400 MHz and 2550 MHz**. The microwaves are directed at your brain. See the “Sonic Attacks” on the Cuban Diplomats. Their MRI's show that it causes permanent brain damage.

Repeat the statement, **“I will only react to Constructive Suggestions,”** to block the harmful effects of the subliminal messages.

For Targeted Individuals – the microwave “bullets” are amplified to produce painful attacks, all over the body. Targeted Individuals are also tracked and hit using satellites - microwave pulses on the crown of the head. **The Deep State operations are funded and run by the wealthy Rockefeller family and the Council on Foreign Relations (CFR.org)**
